VALUE-ADDED SOLUTIONS

We strive not only to deliver high quality products, but also to provide responsible and reliable customer service. Our motto of "Delivering Excellence, Building Solutions" is what every member of our team is committed to, based on a foundation of:

Vision - Goals-oriented planning and implementation

Trust - Respecting and trusting one another

Understanding - Aware and supportive of all duties and disciplines

Empowerment - Opportunities to improve and advance, onwards and upwards

Mr. Lee Thung Hing
 Founder & Chairman, Thung Hing Group Family

Lee Kok Siong Managing Director	Lee Kok Lee Managing Director	Lee Kok Lim Managing Director	Lee Kok Hee Managing Director	Lee Kok Shing Managing Director

ON SOLID GROUND

From the humble beginnings of fixing residential roof gutters 20 years ago, passion and hard work have equipped Mr. Lee with skills and expertise in the metal works trade, not to mention earning him a steady customer base who seek the craftsmanship and superior quality that became synonymous with the Thung Hing name.

Having grown the company industrially and strategically to date, Mr. Lee's ambition and innovations continue to drive new product categories, value-added services and international quality assurance. This commitment to every customer will continue to write the Thung Hing legacy.

“Wisemen's minds and hearts live together under the same roof of wisdom.”

Munia Khan

Family ties

Mr. Lee's leadership qualities and managerial instincts were quickly adopted by his sons Lee Kok Siong, Lee Kok Lee, Lee Kok Lim, Lee Kok Hee and Lee Kok Shing. Together they have found the perfect balance between nurturing long-lasting relationships and innovating competitive project solutions, making the group of companies a formidable force as one of Malaysia's leading builders in the industry.

Fast forward

The Thung Hing Group of Companies prides itself on successfully building a nimble, future ready corporate culture without forgoing the wisdom of being rooted in tradition. This foundation, together with commitment of quality and transparency, is what defines Thung Hing's products, practices and potential.

At Thung Hing we strive to help our clients optimize the value of their construction investment with competitive solutions that put strong emphasis on quality, safety and efficiency. This is evident in our diverse project portfolio that includes healthcare, corporate, life sciences, research and development, academic, public, commercial and residential building solutions.

PRIDE IN PRACTICE

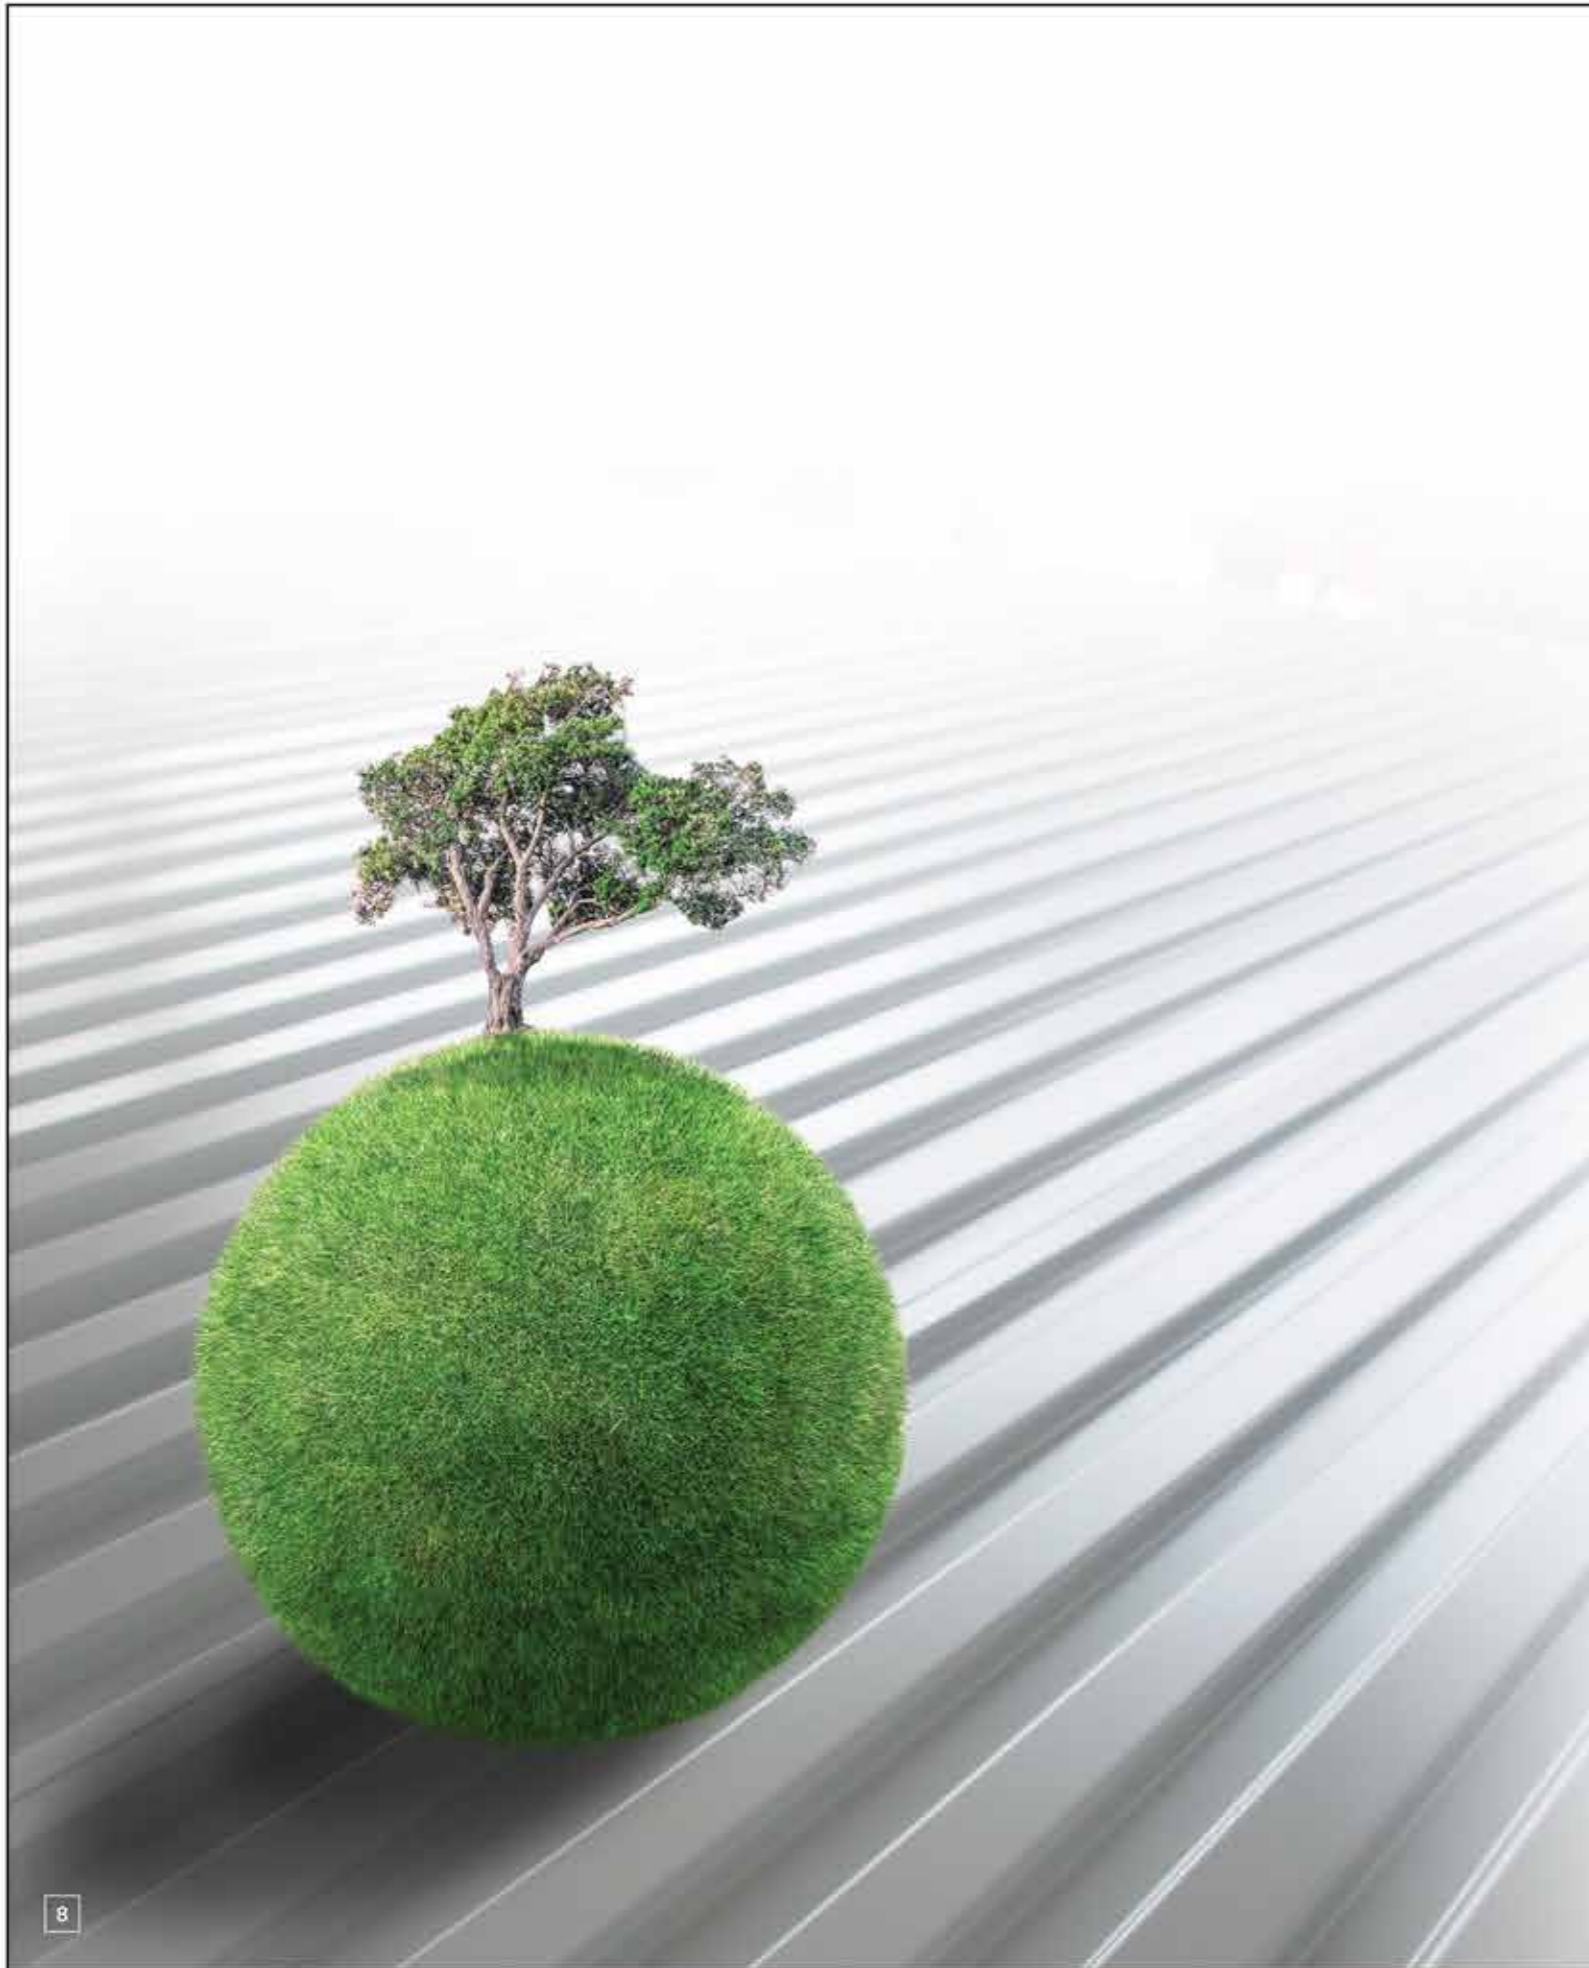

Corporate culture

Training, team building and self-improvement initiatives are designed to better employees on a personal level as much as on professional performance and productivity. Nurturing a team that is honest, fair and accountable is every bit as important as ensuring products of the highest quality.

People power

At the heart of Thung Hing's success is the passion of the individuals. The commitment and drive to pull everything together as a team gives us - and clients - great confidence in building structures that will leave a lasting impression in our cities and communities.

BUILDING HOPE

Apart from acclaimed physical structures, Thung Hing is also a strong believer in building community relations. We continuously instill a philosophy of responsibility towards society in our group of companies, so that we make it part of our mission not only to contribute to the progress of the nation but also the wellbeing of humankind.

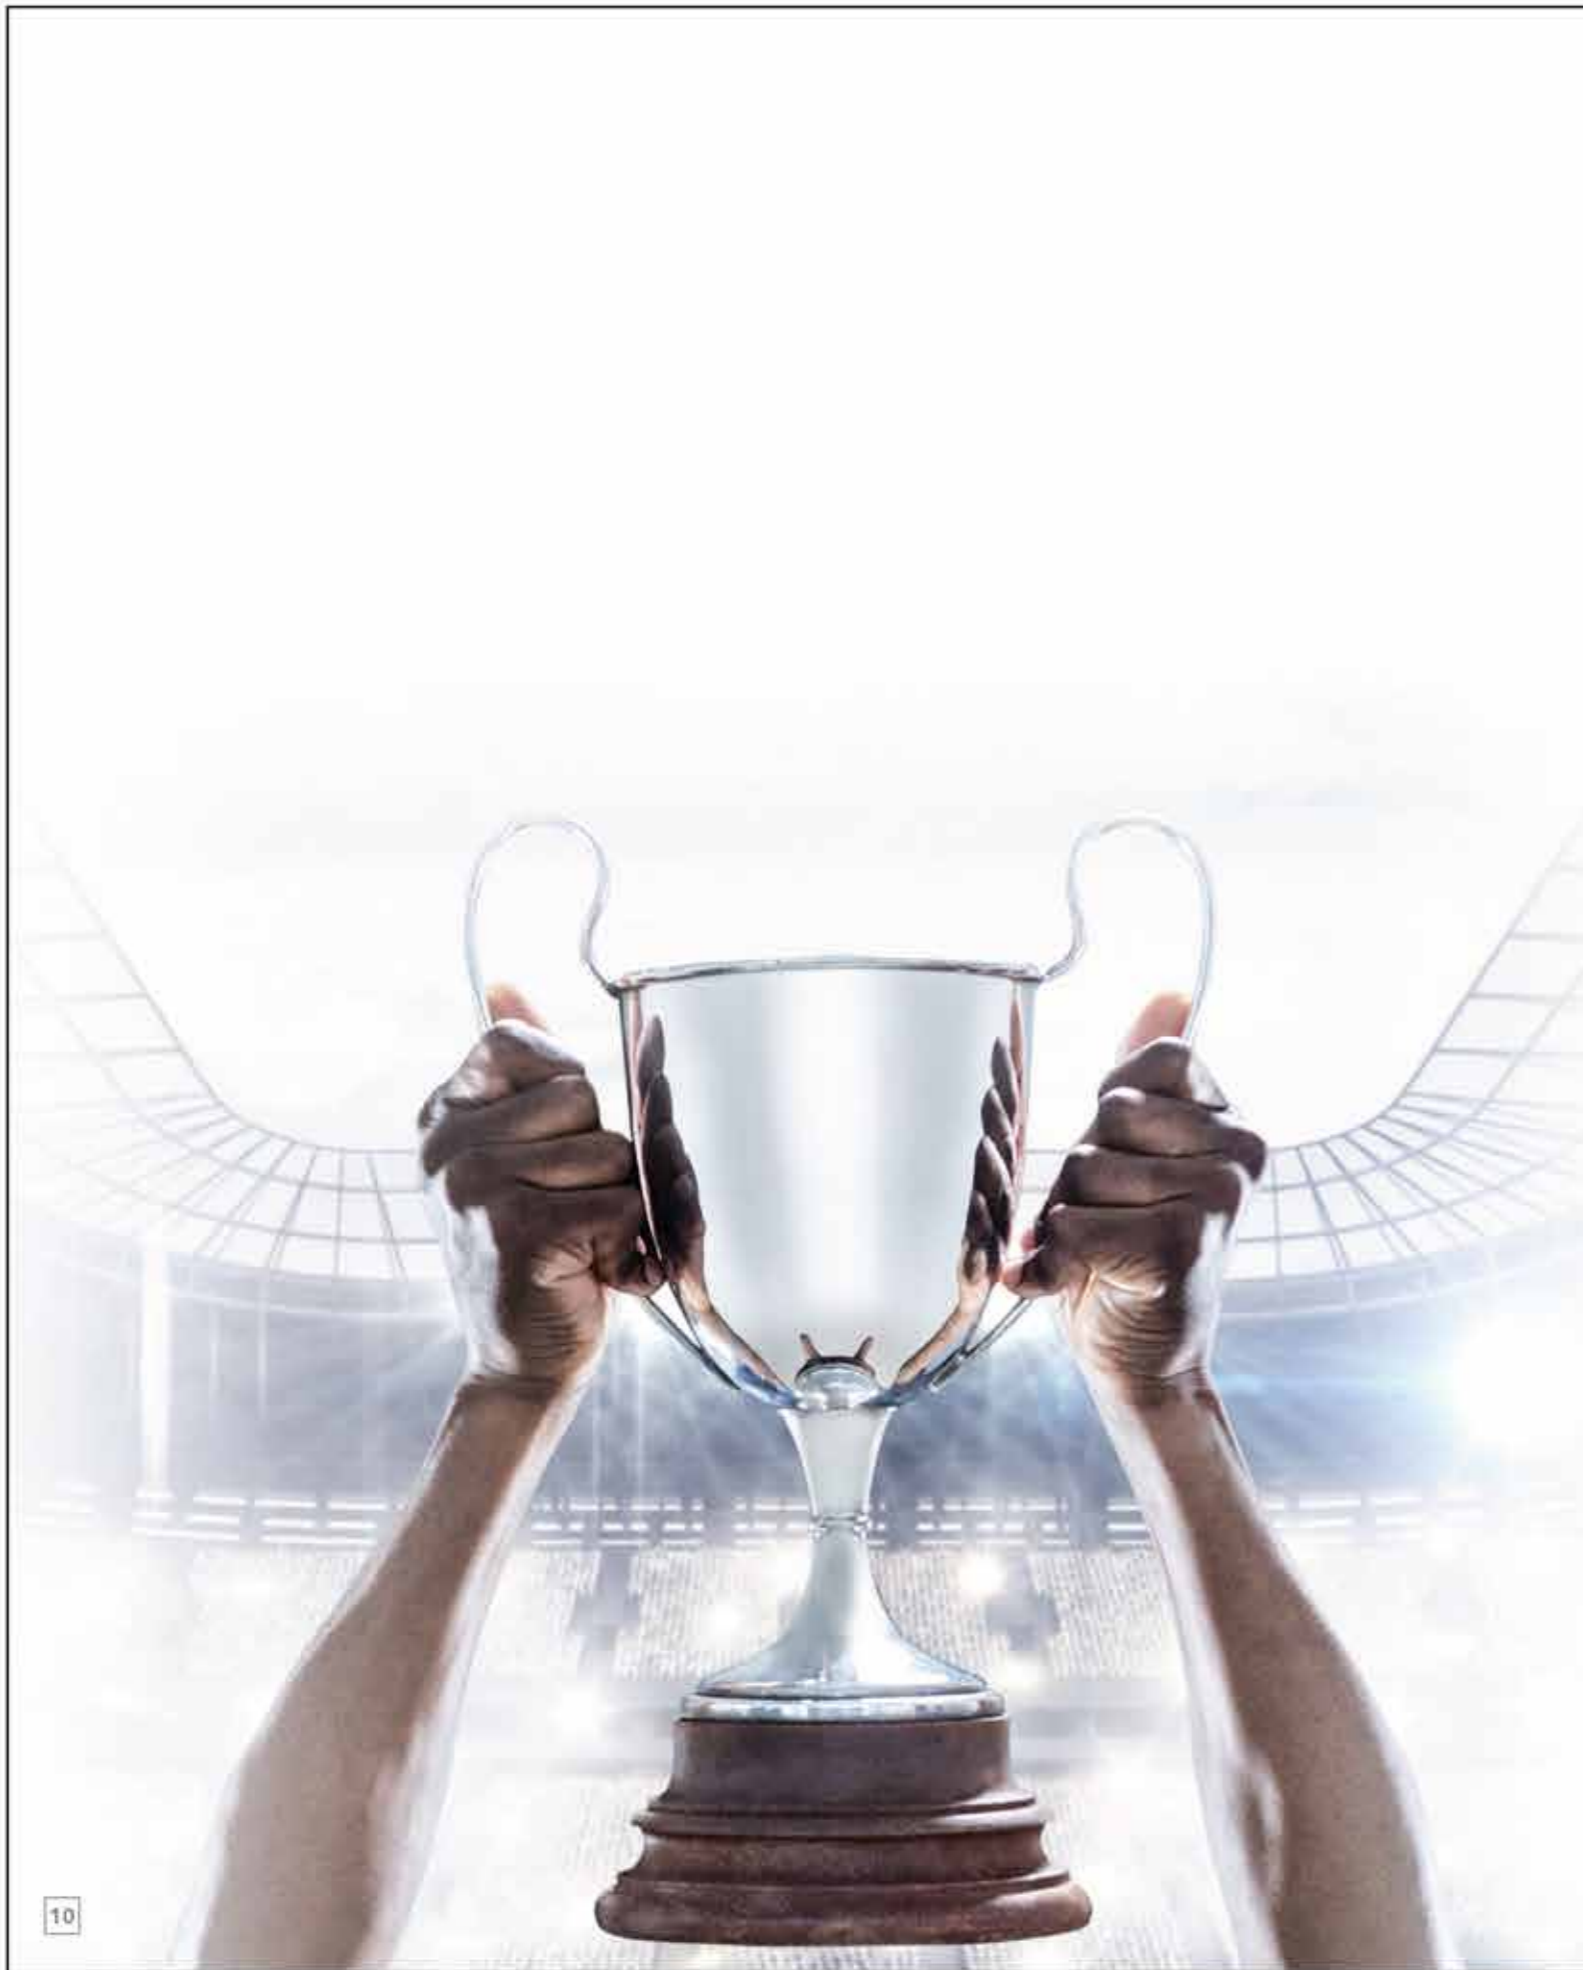

Giving back, paying it forward

We are grateful for how far we've come, and we are committed to give back to society through CSR programmes and home ground activities. The group also works closely with various sectors to promote better understanding and cooperation between all parties.

On the local front, Thung Hing initiates personal efforts where possible, such as restoration of homes wrecked in thunderstorm and providing supplies for homes in need.

HIGH EXPECTATIONS

Our measure of quality has always been two-pronged: meeting industry and world standards, and setting our own strict standards. This is our commitment in everything we do, for products and services alike.

Quality above all

A comprehensive Quality Control/Quality Assurance Plan ensures that all projects are designed, procured, built and commissioned in a manner where each definable area of the work meets or exceeds specified performance criteria and construction standards.

As further proof of quality and reliability, the group is also an approved supplier for JKR (Malaysian Public Works Department), providing materials for government projects.

Seal of approval

Thung Hing is ISO 9001-certified, in recognition of excellence in quality management system. Additionally in 2006 the company won the Golden Bull Award, an accolade celebrating outstanding SMEs. This is testament to not only our financial strength but also innovation and sustainability.

All products under our Roofing Solutions, Framing Solutions, Structural Solutions and Fireproof Solutions series are fully researched, designed and manufactured by Thung Hing's ISO 9001:2008 Quality Management System certified plant.

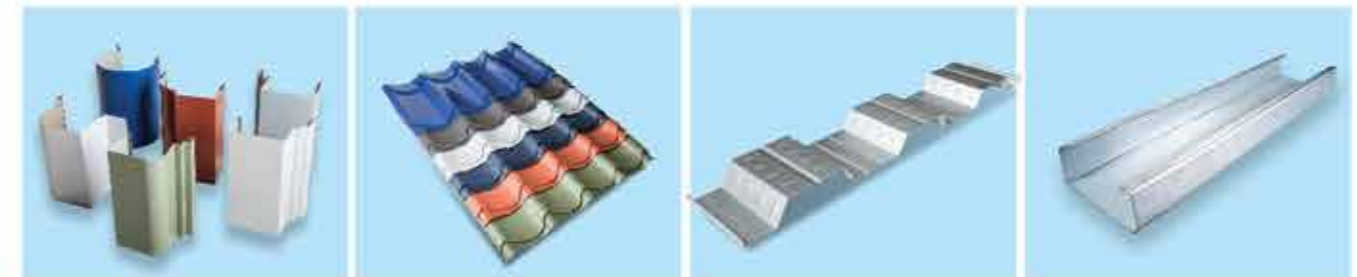

We run a Continuous Process Improvement programme, taking into account the changing construction needs and evolving industry practices. The challenge-based learning is invaluable as we formulate innovation strategies and employ state-of-the-art technology to deliver building materials of the highest quality.
